

**WHAT YOU
DON'T
MEASURE,
YOU DON'T
CONTROL**

The Concept

Convenient and **Controlled** access to PPE and every day consumables.

24/7 Availability with no reliance on staff

Flexibility to locate anywhere in your workplace

Accountability - records usage by individual

Real-time monitoring via web based system

User friendly system

1300 660 519

The Benefits : Safety Enhancement

Ease of access 24/7 to critical PPE

Provides a record of usage

Ensure staff are availing themselves of PPE items

Ability to restrict access to certain products – the right PPE for the right task

1300 660 519

The Benefits : Cost Savings

Improved workplace efficiency:

- No travel time to stores or supervisor lockers

- No waiting at stores counter

- No documentation or approvals required

- Reduced employee & equipment downtime

Individual accountability

Ability to record and back-charge contractors & others

Less waste & loss

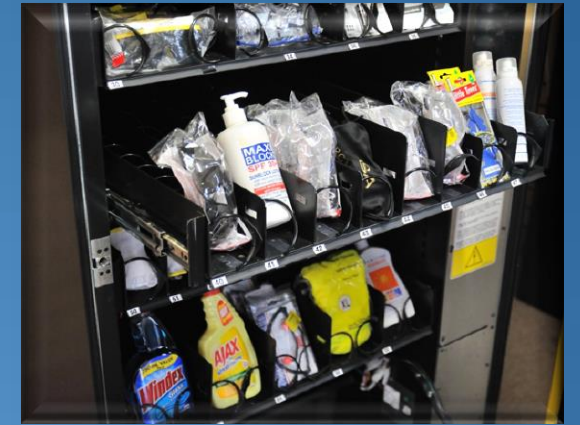

JIT inventory

1300 660 519

Machine Capacity

- Approx 30 to 40 product selections per machine
- Stock for each selection depends on product size – eg.
 - Gloves Approx 10 / slot or 50 / tray
 - Safety glasses Approx 10 / slot or 80 / tray
 - AAA battery packs Approx 30 per slot

Machine set-ups are user defined and only limited by product size and weight restrictions
Flexibility to change over time to reflect actual usage trends
Can integrate access with existing user card systems

Data Management System

Real-time data collection, management and monitoring via web based system:

- Information sent via secure internet connection

- Monitor usage from any location

- Generate usage reports at any time

- Automated notification of low stock levels

- Can also download data in csv format for internal use

- e.g. Supply System interface, Excel reporting.

- Optional real time interface to client ERP systems
